ENVIRONMENTAL SCIENCE

ENVIRONMENTAL SCIENCE (BSC)

Duration: 3 years full-time or part-time equivalent

Excluded Minors:

Ecosystem Management

Recommended Minors:

Environmental Issues; Marine Biology; Resource Management; Waste and Water Management

Recommended Double Majors:

Conservation and Wildlife Biology; Environmental Management and Sustainability; Marine Science

Special Requirements:

This course can be completed internally or externally. External students will be required to attend classes on-campus for some units.

Murdoch's Bachelor of Science is a flexible degree which gives you the opportunity to build deep understanding and practical experience as well as to supplement your studies by engaging with industry and the community on relevant problems. You can even undertake studies through another discipline to broaden your understanding of the way in which science operates in relation to social, business, health and policy environments.

- Murdoch campus (internal) Murdoch campus (external)

Course Codes: B1317 B1317A

Admission Requirements (Onshore):

As per normal undergraduate admission requirements. There are no prerequisites for admission but it is highly desirable for students to have undertaken WACE Chemistry 3A/3C and Mathematics 2C/2D.

Environmental Science

Environmental Science is a multidisciplinary field that seeks to understand the interrelationships between air, land, water, plants, animals and human society. This understanding is essential to develop successful management strategies and address the challenges arising from interactions between humans and their environment. You will develop capacity in scientific method, knowledge, and problem solving which will enable you to identify and resolve current and future environmental issues. This major emphasises hands-on experience through field work, laboratory and research training, and policy and management.

Employment Prospects:

Environmental Science graduates have a wide range of employment opportunities in the areas of climate change, restoration, natural resource management and development, environmental education, policy and planning in consulting firms, government or industry both in Australia and overseas. Employment opportunities are likely to be enhanced for graduates who continue into either Research Honours or the Graduate Certificate in Environmental Assessment and Management or Graduate Certificate or Diploma in Environmental Science.

Bachelor of Science (BSc) in Environmental Science
