Bachelor of Business (BBus) in Accounting

You will have depth of knowledge in one or more business disciplines: accounting, banking, business law, finance, hospitality and tourism management, human resources management, international business, management and marketing.

Management

Accounting is an integral part of the management process in any organisation.

Accounting processes help to evaluate the effectiveness and efficiency of an organisation's operations and performance. The information accountants produce assists organisations to make informed decisions for a variety of purposes, including acquiring or selling shares, lending money, and providing goods on credit.

Accounting also helps managers, owners and investors to look after the assets and investments of an organisation. Capital investment and strategic decisions also use data produced by the accounting process. A fourth year of study is available in the form of an honours year.
